

INSPIRED BY NATURE

For young adults age 9 – 12

How has nature inspired and shaped the way we communicate?

What do whales, bats, and birds have in common? They all use sound for navigation and communication, and their "songs of nature" have inspired the work of inventors, musicians, scientists, and artists alike. We invite your child to become a detective as the Falmouth Public Schools, Cape Cod Conservatory of Music and Arts, Falmouth Art Center, Falmouth Museums on the Green, National Oceanographic and Atmospheric Administration, and Salt Pond Areas Bird Sanctuaries partner to explore the exciting world of bio-acoustics.

Guided by teachers and local experts, your child will embark on a four-day adventure to chase "songs of nature" through air, water, music, art, and history - learning how whales sing, bats screech, and ospreys squeak, and how these and other songs have become inventions, works of art and music, and scientific discoveries that help us communicate with each other and with our surroundings...

Participating faculty: Corine Adams, Dr. Linda Werner, Jim Deasy, Cathy Henrich, Susan Jensen, Lindsey Sherman, Genevieve Davis, and Dr. Sofie Van Parijs

Join us Monday, June 30 thru Thursday, July 3, 9 am – 1 pm
Register early! Enrollment is limited to 20 students. \$125 per student
